Background

The Process

The CSM Process A Brief

CSM Background

- ▼ PR99 Initiative-Reduce Outfitting Costs
 - Reduce the churn created by new COSALs for operational ships
 - A logical process with minimal impact on readiness
- ▼ A Sound, Logical, Fact Based Tool that is currently being used by TYCOMs and SPMs in Assessing the Supply Readiness Condition of their Ships

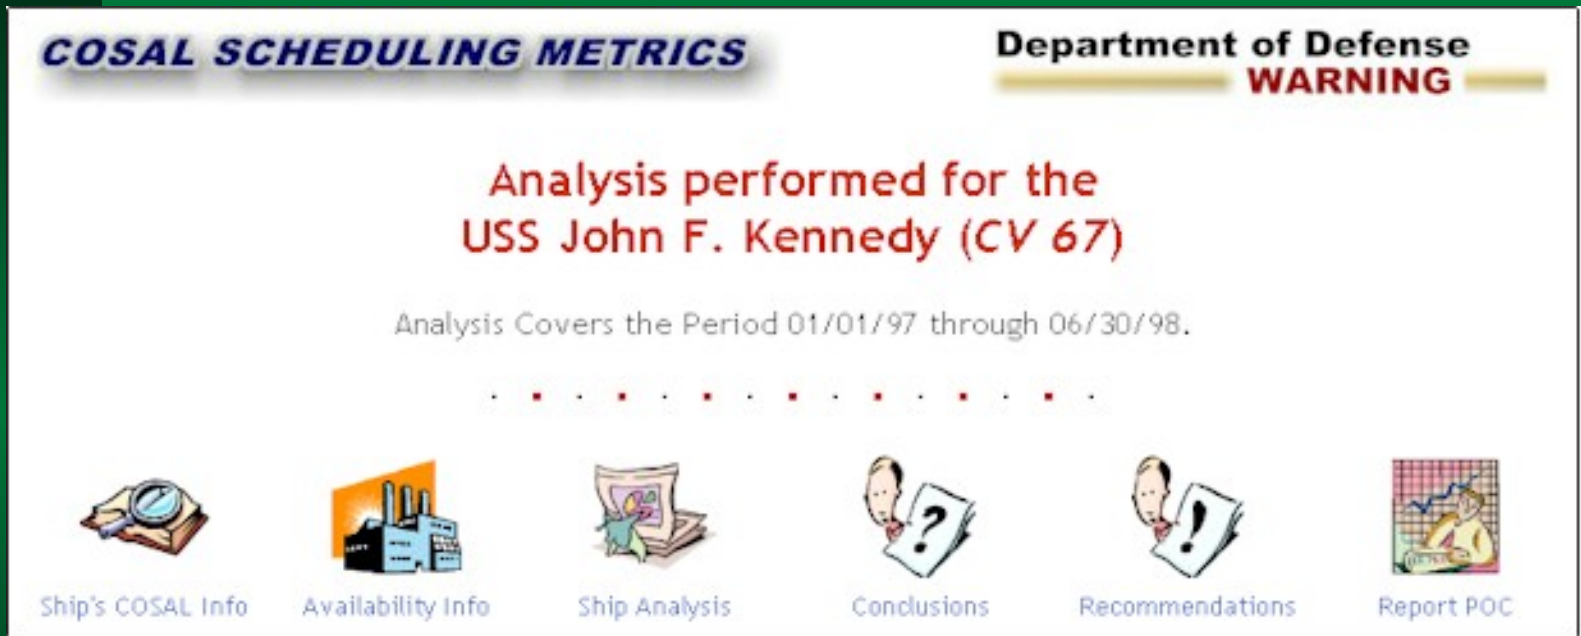

CSM Background

- ▼ “Cliff Notes” for TYCOMs and SPMs
 - Provides Summarized Information Necessary to Effectively Select the Ships that will Need New Allowance Products
- ▼ Package Info So It’s Meaningful and Persuasive
- ▼ Available to all via the World Wide Web

Cliff Notes and More !

- ▼ Each ship report summarizes COSAL and Availability info, analysis performed, conclusions reached, an NSLC recommendation and a POC for further information.

The CSM Process

- ▼ Draw Down Fleet Wide Allowance Effectiveness Info From 3-M Database.
- ▼ Determines Those Ships That Have an Indication of Poor Material Support.
Certain Ships filtered out per fleet request
Problem ships targeted based on control limits

The CSM Process

- ▼ Perform Allowance Analysis
 - Review/analyze 3-M supply source codes reported upline from the ship.
Develop/review trends from data.
- ▼ Perform Configuration Analysis
 - Review/analyze APL, CDMD-OA, EIC and WSF information
- ▼ Develop and Publish Reports
 - Available for viewing via the ACP website

Need Help ?

- ▼ If you've got questions, we've got answers!
 - Our Logistics Policy, Studies and Analysis Division performed the research and produced the reports. Call us at (717) 605-5478 (DSN 430).
